Designing and Implementing Simulation-Based Mastery Learning Curricula

March 1 - 31, 2021
August 2 - September 1, 2021

Every Monday and Wednesday, 5:30pm - 8:00pm CST
No Class on Wednesday March 3rd and August 4th

Mastery learning is a rigorous form of competency-based medical education. Use of the mastery model has been shown to improve patient care quality and lower health care costs. Northwestern Simulation faculty are leading experts in the use of simulation-based mastery learning to develop and measure clinical skills. This comprehensive course will offer participants opportunities to acquire the knowledge and skills needed to design and implement mastery learning curricula.

This activity has been approved for *AMA PRA Category 1 Credit™*

Course Director
William C McGaghie, PhD
