NORTHWESTERN WOMEN IN MEDICINE LECTURE SERIES: THRIVING IN THE VIRTUAL WORLD

Women physicians face unique challenges and obstacles throughout their professional careers. These challenges may affect leadership development and opportunities for women in medicine resulting in a gender gap in the governance of academic medical centers. Women physicians currently lack a conference or forum for discussing strategies to achieve equality in the workplace, wellness and work life balance, mentorship and career development. The 3rd annual Northwestern Women in Medicine conference will help to identify the obstacles that contribute to gender inequity and will start the discourse to bridging it by hosting a virtual lecture series monthly.

We will shed light on gender disparities and then share experiences and tools to overcome the barriers that exist in medicine for female physicians so as to empower and create a network to lean upon.

LEARNING OBJECTIVES

At the conclusion of this activity, participants should be able to:

- 1. Describe strategies to navigate the virtual world to continue advancing professional growth.
- 2. Describe the impact on COVID-19 on women in academic medicine using evidence based data.
- 3. Explain and cultivate characteristics of being an inclusive leader and mitigate bias in the work environment.
- 4. Describe strategies to guide graduating medical trainees for a fulfilling career in medicine.
- 5. Learn how to form partnerships between MD and PhD to advance science.
- 6. Outline non-traditional pathways to leadership in academic medicine.
- 7. Develop skills to effectively use social media as medical professional.
- **8.** Identify barriers that exist for women in leadership and explore ways to promote gender equity.

TARGET AUDIENCE

This continuing medical education program is designed to meet the educational needs of Multiple Specialties.

VIRTUAL PLATFORM

The program will be held virtually. Information about the virtual platform will be sent to registrants three days prior to each session.
