# THE 4TH ANNUAL HEART TEAM SUMMIT

A Heart Team is now a standard treatment approach for complex cardiovascular patients. The Heart Team consists of cardiologists, cardiac surgeons, nurses and other health care specialists. This includes regular meetings to make consensus treatment recommendations for conditions including obstructive coronary artery disease and valvular heart conditions. This series will provide expert lectures and case presentations geared toward health care professionals who may be part of a Heart Team. Included will be the latest innovations as well as standard treatments, including transcatheter valvular heart therapies and coronary revascularization strategies.

## LEARNING OBJECTIVES

At the conclusion of this activity, participants should be able to:

1. Describe the concept of the Heart Team, including the key components and functionality
2. List transcatheter options to address heart valve pathology including aortic, mitral, tricuspid and pulmonic stenosis and regurgitation
3. Describe the latest interventional techniques and therapies for structural heart disease and congenital heart disease
4. Recognize patient selection and appropriate patient referral for surgical versus percutaneous/transcatheter mitral and aortic valve intervention
5. Apply various diagnostic technologies including transthoracic echocardiography, intracardiac echocardiography, TEE, CT, and CMR to guide management of valvular heart disease
6. Describe the differences in outcomes in valvular and coronary pathology as it refers to men and women.
7. Describe the racial disparities encountered in cardiovascular health
8. Utilize the various hemodynamic support and interventional/surgical tools to assist in the management of cardiogenic shock
9. Identify the indications for LA appendage closure and the available and emerging technologies to manage the left atrial appendage and how it can mitigate stroke.
10. Summarize the latest developments and the current guidelines on the appropriate use of surgical and percutaneous coronary revascularization.

## TARGET AUDIENCE

This continuing medical education program has been designed to meet the educational needs of Cardiologists, Internists, Physician Assistants, Vascular Surgeons, Electro Physiologists, Physicians, Physician Assistants, Nurse Practitioners, Residents and Nurses and any other health care professionals who participate in the care of atrial fibrillation.

## CONFERENCE LOCATION
