

Almost Home Kids, presents

Management of Medical Complexities in a Transitional Setting

with Peter J. Smith MD, MA

Audience:

Primary care clinicians (physicians, nurse practitioners, and physician assistants).

Learning Objectives:

At the end of the workshop attendees will be able to do the following

1. Describe the challenges that confront the families of children who are medically complex.
2. Explain from the providers' perspective, the obstacles encountered as well as the opportunities with treating children with medical complexities in the community.
3. Demonstrate how the current health system influences the care of children with medical complexities.
4. Recognize the role of the medical home within the larger system of care (medical neighborhood) for children with medical complexities.
5. Apply concepts learned to example case studies
6. Demonstrate appropriate tracheotomy, G-tube, and ventilator care.
7. Apply the interdisciplinary health care model required to treat children with medical complexities in a community-based health center.
