The landscape in gastroenterology is rapidly evolving with novel innovation and advances in minimally invasive procedures. The endoscopic role of gastroenterologists is shifting rapidly from diagnostic to therapeutic procedures. Join clinician leaders from the **Northwestern Medicine Digestive Health Center** as they welcome internationally and nationally renowned speakers for a full day of engaging and thoughtful discussion, including exciting live cases.

**REGISTER HERE!**

## PROGRAM OBJECTIVES

After attending this educational activity, participants should be able to:

1. Review novel innovation in screening and surveillance for Barrett's Esophagus and esophageal cancer.
2. Employ best practices in colonoscopy quality, polypectomy and endoscopic mucosal resection.
3. Describe the current state-of-the-art management of pancreaticobiliary disease.
4. Demonstrate endoscopic techniques for advanced tissue resection and pancreaticobiliary disease.
5. Discuss the endoscopic management of obesity and metabolic disorders.
6. Identify novel innovation and techniques in third space endoscopy.
7. Explain the current role of artificial intelligence in gastroenterology practice.
