The Lynn Sage Breast Cancer Symposium will provide 3.5 days of in person presentations and interactive Q&A sessions. Referred to as the most valuable breast cancer meeting worldwide for the practicing clinician, the Lynn Sage Breast Cancer Symposium will include a superb line-up of internationally recognized faculty who will present the latest research findings and be available for interaction following their presentations.

Educational Objectives
1. Describe the role of artificial intelligence in breast imaging and pathology.
2. Discuss advances in the evaluation, screening, and management of women at increased risk for breast cancer.
3. Cite the current status of adjuvant and neoadjuvant therapy for ER+, HER2+, and triple negative breast cancer.

Target Audience
The target audience for this activity includes medical oncologists, radiation oncologists, surgical oncologists, fellows in training, research nurses, and allied health professionals in breast cancer treatment.
